SERVICE LOCATIONS

OUR APPROACH

- Reduce food waste going to landfill by promoting reuse through food donation, digestion, composting and animal feeding programs
- Promote and encourage development of waste reduction and recycling programs
- Reduce the overall amount of solid waste going to landfill
- Provide full service recycling services to reduce our customer's carbon footprint

ORGANICS

DIVERSION OPTIONS

- **Donations First**
 - Work with Regional Food Banks/ Donation Agencies
- **Direct Animal Feed**
 - No Meat or Eggs; Limited by regulation at the State level
 - Promotes local use and closed loop sustainability.
- **Renewable Energy**
 - Biogas - anaerobic digestion converts organic waste into energy
 - New England, New York, Pennsylvania, Virginia, North Carolina
- **Compost**
 - Convert organic waste to a nutrient rich soil amendment and salable product
 - Can accept meats, dairy, liquids, compostable products

FOOD DONATIONS

- By being a better environmental and corporate citizen, you give back to your community
- Food donation programs can help get edible food waste out of your trashcan and into the hands of those in your community who need it

Businesses win by reducing their purchasing and solid waste disposal costs and reaping tax benefits

Communities win by reducing the waste going to landfills and by keeping a cleaner environment

Charities win by obtaining food and supplies to help those most in need

FEEDING ANIMALS

We Are Engaging Controlled Animal Feeding Studies at Rutgers University and Highlander Livestock

ANAEROBIC DIGESTION

COMPOSTING

SOURCE SEPARATION

EDUCATION

CONTAINER OPTIONS

ORGANIC WASTE GRINDER

- Eliminates leaks, odors, insects and vermin
- Streamlines service and improve efficiency
- Accept all liquids and all organic solids
- Reduces volume for storage and transport
- Provides consistent feedstock for anaerobic digesters
- Grinders and pulpers can be sized for volume and storage needs

ONSITE OPTIONS

- Multiple Onsite Options – Limited Use
- Streamlines service and improve efficiency
- Accept some liquids and some compostable solids
- Reduces volume for storage and transport
- Bin can be sized upon volume and storage needs

TRANSPORTATION

TRANSPORT OPTIONS
